

README FILE

**THANK YOU FOR DOWNLOADING MY WAVE FILE LISTING FOR JOINT
OPERATIONS TYPHOON RISING.**

WRITTEN BY: CHRISLEW200

EMAIL: WNPBOILER1@HOTMAIL.COM

THANK YOU FOR YOUR HELP:

INSERT NAME HERE IF I FORGOT YOU

EAGLE EYE

A BULLET

THE MAN THAT SENDS ME MESSGES ON NOVAWORLD

DEVILSCLAW

FWO RAVEN

**AND THE ONES I FORGOT I APPOLOGIZE IF SOMEONE HAS ALLREADY FILLED
IN THE SPARE BOX**

HOW TO USE THE WAVE LIST?

THE LIST IS DIVIDED UP INTO SEVERAL CATEGORYS THESE ARE EITHER
ACCENTS, EFFECTS, VEHICLES OR ANIMALS.

- 1) SELECT THE VOICE CATEGORY YOU WANT TO HEAR.
- 2) CLICK SEARCH IN ADOBE ACROBAT
- 3) TYPE IN THE KEY WORD YOU WANT THAT VOICE TO SAY
- 4) CLICK ON THE SEARCH BUTTON THIS WILL THEN FIND ALL THE WAVES THAT
CONTIAN THAT WORD THE FIRST ONE WILL BE ON THE PAGE YOU SELECTED
AND WILL BE HIGHLIGHTED
- 5) WRITE DOWN THE BLUE TEXT TO THE LEFT OF THE PHRASE YOU WANT AND
THATS YOUR WAVE FILE FOR THE WAC.

TRAINING MISSIONS	
z00ar100.wav	welcome to logi caraba village this a no pressure enviroment for you to practice all the basic skills needed to survive in combat if your new to joint operations or first person shooters proceed straight ahead to the market place and you will be instructed on basic movement and player control if your looking information on how to use the armory use the concrete building to the left of your starting position when your done either of the team mate driven trucks will take you to a training ground where you can practice shooting at passive targets that wont shoot back.
z00ar101.wav	these are the real basics on how to control your character on joint operations if your new to tactical gaming this is probobaly a good place to start
z00ar102.wav	by default the wsad key control youur movement use the move to look around
z00ar103.wav	when standing or crouched the q and the e keys will let you leen this is useful in tactical situations as it allows you to look around corners
z00ar104.wav	tapping the space bar will allow you to jump jumping hiandy for getting around small obstacles or barracades
z00ar105.wav	the c x and z key allow you to switch your stance between standing crouch and prone in addition to being usefull for concealment also your weapons accuracy is greatly affected by your stance press x to crouch and move forward under the boat rack crouching is best for accuracy and is the best choice for when your loud footsteps could compromise your position pressing z will put you in the prone position this the best for accuracy but is the slowest for movability.
z00ar106.wav	if you want to practice climbing ladders theres one leaning against the market building if you walk straight towards it you will attach automatically simply lookup with the mouse if you want to climb up and look and look down if you want to climb down when you reach the top of the ladder keep moving forward and you will automatically walk off
z00ar107.wav	the roofs of the market place arent high enough to any really dammage from falling so feel free to practice your movement controls including jumping from roof top to roof top
z00ar108.wav	you can follow the waypoints to the docks and practice some more advanced moves or head back to the armory by the start point you can see the waypoints on the small round ovehead spin map located on the lower right portion of your hud the + and - kes will zoom the map in and out and the f7 key will cycle through available waypoints
z00ar109.wav	cross the pier walkways to the boat docks use your new found skills to jump and strafe across the uneven docks
z00ar110.wav	you can execute some additional moves which will come in handy when in combat when running forward you can dive by using the prone key c by default
z00ar111.wav	while prone the q and e keys will role you left or right its diffult to shoot but could get you behind cover if caught while lieing down
z00ar112.wav	feel free to jump into the water to practice swimming you can increase or decrease your depth by looking up or down in that direction
z00ar113.wav	when submeregged you will see a breath meter appear if you dont suffice before the meter expires you will drown
z00ar114.wav	try shooting you weapon while in the water you will notice that your accuracy is greatly diminished you wont be able to sight in either so engagements from the water are extremly dangerous
z00ar115.wav	exit the water by climbing out on the ladders swim to the ladders and lookup you will automatically detach when you reach the top
z00ar116.wav	head to the armory near the start point to familarise yourself with its use or jump on a truck to go out to one of the ranges
z00ar117.wav	the armory is a key elemnt in multiplayer games in multiplayer you can use the armory to change your class type
z00ar118.wav	once inside the armory press shift to activate the amory menu you can change your load out by clicking on the drop down menus changing your class type in multiplayer will effect what weapons are available to you the amount and type of weaponary you carry will effect the speed in which you can move the more wait you carry the slower you move your characters wait will decrease as you use ammo or wepaons and your speed will increase accordingly your weight can be seen at the bottom of the armory press shift or accept to exit the armory.
z00ar119.wav	there are several types of amory from building or trucks to small caches which can be found hidden in buildings there is a small armory cache hidden in the building where you started
z00ar120.wav	either of the trucks at the village will take you to our mprovised weapons range it's a good place to practice with a variety of weapons
z00ar121.wav	to quickly reload hit shift twice while at the armory this will resupply your current load out
z00ar122.wav	the vehicle targets will automatically respawn so you will have an endless supply of targets on which to practice simply exit the mission when your finished the esc key will also let you alter some of the game options while you are paused
z00ar123.wav	if you want to get a closer look at your targets press the b key to bring up your binnoculars the binoculars will give you range information on distant targets the display at the bottom of the cross hair view indicates meters to the cross hairs.
z00ar124.wav	during night operations pressing N will activate your night vision goggles the goggles are helpful for dark nights and interiors but will limit your depth perception and contrast by pressing ctrl and the plus or minus will cycle the intensity of your goggles this is indicated by a power meter located at the top right of your screen.
z00ar125.wav	to help communicate with your team mates in multiplayer you have access to two sets of textual audio macros f9 will bring up a list of macros that will be heard by all players in a given area and f10 sends a radio message allover the map to your team mates only your macro options will change depending upon your class what vehicle or emplacement your attached to or what game type you are playing.
z00ar126.wav	the final tool in your arsel is the commanders map which is accessed with the V key the commanders map allows you to view the entire map in multiplayer you can create or join a fire team or issue orders to players on your fire team and mute or punt pacific players use caution as the game is not paused while in the commanders map make sure you have good cover when using it clicking ok or v again will return you to normal view.
z00ar127.wav	you will see hints or tips appear every once in a while if you would like todisable the pop ups press escape then options uncheck the keyboard hints and game hints boxes then you wont get anymore pop ups
z00ar128.wav	to attach to the highlighted position on a vehicle press use this mapped by default as the shift key
z00ar129.wav	to switch positions while attached to vehicle hold down the shift key and press the number that corresponds to the new position refer to the vehicle icon on the bottom left of the screen if another player occupys a position you cannot switch there
z00ar130.wav	press the shift key to detach from the vehicle if you happen to be looking at another postion you willautomatically attatch there.
z00br100.wav	an enemy convoy has been spotted approaching from the west press 7 to switch to your at4 rocket launcher you have 2 rockets to use before you will have to restock at an armory try to destroy the lead vehicle and slow the convoy armoured vehicles take more than one hit to destroy so sim carefully
z00br101.wav	use the armory to reload when you used both your at4's
z00br102.wav	stopping the btr bought you some time either reload in an armory or use the mark19 grenade launcher to finish off the rest of the convoy
z00br103.wav	the convoy is approaching the fuel dump hurry up and stop them
z00br104.wav	the fuel dump is under attack
z00br105.wav	good job you were able to stop the enemy assault
z00br106.wav	we lost the fuel dump you will need to be more effective next time
z00cr100.wav	rebel helicopters have been spotted to the north of your position we can assume they plan to assualt the supply depot for our armoured vehicles just south of the river junction arm your self with a stinger missile by presing the 7 key engage the enemy aircraft before they can do any serious dammage to our supplys
z00cr101.wav	you must use the scope to lock on to a target you will here an audio tone when your missile has a lock fire as soon as you have a loock
z00cr102.wav	enemy rocket helo inbound from the north east take him out before he can fire at you
z00cr103.wav	reload at an armory before the rest of the aircraft arrive
z00cr104.wav	heavier aircraft will take more than one shot from a stinger man the emplaced 60 cal machine gun to finish them off
z00cr105.wav	good job all enemy aircraft have been destroyed
z00cr106.wav	the enemy is attacking the depot hurry up and finish them off
z00cr107.wav	the depot has been destroyed restart this training mission to work on your skills with the stinger
z00dr100.wav	the rebels have captured an old radio relay station and a bunker at the top of a mountian over looking a friendly indonesian bay we have 2 ah6 little birds on route to destroy it we have just had reports about anti aircraft batteries located around the bunker you need to take them out as soon as possible as the pose a serious threat to our aircraft follow the waypoints and get in range of the bunker
z00dr101.wav	now that your within range find a safe spot and select the mortar by pressing the 7 key before firing you need to deploy the mortar and choose a target from the map right click your mouse to deploy the mortar you wont be able to move while deployed so choose carefully where you choose to setup your mouse now controls the redicul on the map the further away your target is the less accurate you will be left click your mouse to fire one round once you have fired a salvo you will need to find a armory to reload dont forget to right click to pack up the mortar again
z00dr102.wav	our little birds are approaching you only have a few seconds left to destroy the air defenses
z00dr103.wav	looks like most of the air defences are down good work

TRAINING MISSIONS	
z00dr104.wav	in multiplayer games you can work with other players who spot targets for you the can identify targets for you with a lazer designator you will see the markets on the map and you will have greater accuracy when firing at the designated target
z00dr105.wav	good job the helicopters destroyed the enemy base
z00dr106.wav	both of our aaircraft are down you will need to do better than that
z00er100.wav	visit the nearby armory to select any load out changes and then move quickly up to the overwatch position from that vantage point scan the area to the north to pick up targets a flight of our chinook helicopters and we need you to make sure the area is clear of any stinger missile troops or theyre emplaced weapons
z00er101.wav	if your planning on operating from the same area for a length of time it's a good idea to protect your position with clay more mines they activate automatically so just place them a safe distance away from you facing any approaching path toward you.
z00er102.wav	once your in place go prone in ara where blending in with the surrounding enviroment going prone improves your accuracy and reduces the sway that is noticable when you scope in press the b key to use your binoculars and scan the area a good sniper will sweep in a left to right pattern starting at close range and extending out from his position while scanning you should make note of the distances for various landmarks that way you wont have to keep switching between your scope and your binoculars the range finder is located in the bottom center of the binoculars when your done scanning press b to toggle off your binoculars and switch back to your rifle right click and scope in on a target and engage.
z00er103.wav	if the range of your target doesn't match your settings exactly you will need to use the hold off technique select the nearest scope increment by pressing the apostrophe key or shift apostrophe to adjust up and down or you can hold the control key and change the elevation with your mouse wheel set the elevation to the nearest 100 metres rounding down then use the mill dots on the scops crosshairs to manually raise the cross hair over the intended target test with this a bit to see how much elevation is needed to hit a target at a 50 degree increment
z00er104.wav	hurry up and finish off the enemy anti air units our helicopters are inbound
z00er105.wav	good work the major threat to our aircraft has been disabled
z00er106.wav	both chinooks are down you need to identify and engage targets a lot faster than that
z00er107.wav	you may proceed to the extraction point to complete this mission but command has authorized you to stay in the area and engage any targets of oppurtunity there is an enemy mortar position on the hill to the north it's a fairly challenging distance but you should be able to zero in on them before they find your position
z00er108.wav	nicely done the mortar crues have een eliminated go ahead and proceed to the extraction point
z00er109.wav	the longer you stay in one place the easier it will be for the enemy to locate and destroy you relocate to another observation point now
z00er110.wav	keep moving after every few shots move up to the last observation point now
z00er111.wav	you have limited ammo so make every shot count if you need to resupply your ammunition try to find a near by armory with out being spotted
z00fr100.wav	destroy the enemy puma in the village before it can depart for the rebel head quarters there are enough defenses around the aircraft that you should create a diversion before entering the village theres a com dish near the village that will make an appealing target
z00fr101.wav	stay low to reduce the chances of being seen take out the gunner when you have a clear shot
z00fr102.wav	use one of your fragmentation grenadesto take out the target press the 5 key to choose frag grenades click the left mouse button to throw
z00fr103.wav	that should keep the guards busy for a while stay down low in the canals and make your way into the village only engage the troops if they spot you you don't want to give away your position
z00fr104.wav	sneak up to helicopter and plant a charge in the cabin be sure to clear the area of any guards first
z00fr105.wav	press the seven key to select the stachel charge left click your mouse to drop it
z00fr106.wav	good now leave the area and detenate the charge when your ready
z00fr107.wav	press the 8 key to select your deteriater then left click your mouse and you will set off any charges that you have planted in multiplayer games when your dead any charges you set will disappear from the world
z00fr108.wav	hurry and deteriater the charge the aircraft is almost out of range
z00fr109.wav	good job the super puma has been destroyed
z00fr110.wav	the aircraft got away from you you willneed to work faster next time
z00fr111.wav	hurry and plant the charges the crue is on route
z00fr112.wav	for an added challenge with a grenade sneak up to the bunker and try and get one through the window
z00gr100.wav	the m203 grenade launcher in combination with the m16 rifle is a good tool for eliminating enemy infantry and lightly skinned vehicles in this mission you will need to eliminate bunker positions while defending your position from attacking enemy troops
z00gr101.wav	switch to the grenade launcher by pressing 3 twice which will cycle through weapon modes right click to switch into a sighted view
z00gr102.wav	when sighted you can adjust your range by holding control and rolling the mouse wheel
z00gr103.wav	take out the emplaced weapons at the bunker but keepan eye out for enemy troops advancing on your position
z00gr104.wav	good job the bunker is helpless take out any remaining enemy and rush the bunker when its safe
z00gr105.wav	take cover those enemy patrol boats have some serious weaponry on board
z00gr106.wav	if your low on grenade rounds reload at the armory
z00gr107.wav	your in now defend the bunker from any remaing enemy that might have ideas about taking it back
z00gr108.wav	nice work you have captured the bunker
z00gr109.wav	press 3 to cycle back to rifle mode for engaging close targets
z00gr110.wav	with practice you will be able to engage targets with the m203 without having to sight in
z00gr111.wav	the squad machine gun increases the fire power of the unit and is capable of delivering a heavy accurate volume of fire power light machine guns are usually employed against dismounted infantry emplaced weapons and light vehicles the saw is also good as a close quarters weapon
z00gr112.wav	a formitable rebel force is approaching from the south you must hold the base until a group of inbound strikers arrive the rebels have you greatly out numbered so effective use of heavy fire power is essential
z00gr113.wav	press three to select the machine gun generally machine guns are fully automatic so you will need to keep close tabs on your ammo
z00gr114.wav	machine guns are heavy so they are best fired from supported positions your accuracy will increas if your sighted in when prone or crouched only fire from the standing positon as alast resort
z00gr115.wav	situational awareness means more than just checking your ammo this is the jungle the enemy isnt just going to come from one direction
z00gr116.wav	you have lost half your squad if you wanna survive you will have to keep your finger on the trigger and your head on a swivel
z00gr117.wav	when you get low on ammo take cover before reloading it takes time to reload a machine gun and you don't want to b caught in the open
z00gr118.wav	you've lost you entire squad this is unacceptable soldier
z00gr119.wav	the convoy has arrived and your still in one piece good job
z00gr120.wav	make sure you have good cover when you go prone to engage the enemy and don't forget to check around you once in a while
z00r100.wav	do not shoot any of your team mates or civilians if you do your training mission will be terminated immediately
z01r100.wav	welcome to camp clarke for some practice with the vehicles you will be using during your battles walk up to the near by fav and press the shift key when you see the highlight ed control seat
z01r101.wav	now drive the fav into the empty sandbag bay
z01r102.wav	good now hold down the shift key and the 2 key to switch to the 50 cal and destroy the barrels in the shooting range
z01r103.wav	ok get back inot the drivers seat and drive this fav past the tower and take a left down the road find the chinook helicopter and load the fav onto it you can follow the green waypoint on your spin map to find the chinook
z01r104.wav	you can control the forward speed of your vehicle by pressing the z x and c keys the z sets it to lower speed x medium c higher these controls are usefull when trying to monuver around vehicles or obstacles
z01r105.wav	good driving leave the fav here and walk over to the left hanger drive an atv into the city follow the spin map waypoint to get there
z01r106.wav	our base is beeing attacked find the armoured striker in the city and man the 50 cal inside the driver is waiting for you go now
z01r107.wav	watch out they have taken control of the road block
z01r108.wav	your driver has been killed press the shift key and the 1 key to switch to the drivers seat and continue to the base
z01r109.wav	take out anymore enemy vehicles on the way we don't need anymore of them reaching the base
z01r110.wav	firs your striker weapons and desroy those rebel btr's coming from the east do it quick before they destroy your striker
z01r111.wav	good job now defend the south side of the base and reinforce the rst of the team
z01r112.wav	great job soldier you will be a fine team member in the heat of battle

TRAINING MISSIONS	
z02r100.wav	welcome to rouser island naval station you're here to gain experience on using the boats we will be using when we encounter the enemy try loading vehicles on to the lcac or take a zodiac through the obstacle course when your ready join the 2 mark 5 crews at the south piers
z02r101.wav	take this zodiac and practice going through the obstacle course located oat the islands outer ring
z02r102.wav	ok soldier join the crew of this mark 5 and man the 50 cal or the grenade launcher the pilot will take you outside the outer ring of the island and past 12 static targets there all marked with red beakins andshouldnt be hard to spot watch for red target markers on your hud
z02r103.wav	the pilot will take you back to base for more training
z02r104.wav	pilot this mark 5 out into the open water to the south and locate the enemy patrols boats and position your crue so they can fire on the moving targets
z02r105.wav	that's it good job return to the base and park between the two concrete piers or practice driving around the island
z02r106.wav	well done jkeepthis training in mind when your out on the water
z02r107.wav	looks like you got hostiles sink that enemy patrol boat
z02r108.wav	two more straight ahead of you take them out
z02r109.wav	when boarding a boat use you mouse to locate the attatch points and highlight one of them
z02r110.wav	press use to attach to one of the highlighted postions on the boat the use key is mapped to shift key by default
z02r111.wav	to switch positions while attached to a boat hold down the shift key and press the number that correspondsto the new position refer to the vehicle icon on the lower left of the hud if another player occupys a position you cannot switch to that one
z02r112.wav	you can control the forward speed of your boat by using the z x c keys this assist sin monouvability
z02r113.wav	keep in mind that surprise is often your most effective weapon when your shooting at real enemy units instead of targets you should hold your fire until your in range this way you will get them by surprise as you wont activate theyre threat indicator on theyre hud
z02r114.wav	in ship to ship combat be aware of your oponents weponary and the rotational limits of those weapons try to engae the enemy from offensive angles where his offensive power is least powerfull
z02r115.wav	take any of the nearby land vehicles and practice parking them on the nearby lcac
z02r116.wav	good job feel free to continue practicing or for free to move on to some of the other excercises
z02r117.wav	good shooting
z02r118.wav	good enough for training but you will have to be quicker when facing real enemys
z02r119.wav	get back in the boat soldier you're here for combat training not swimming lessons
z02r120.wav	don't worry about the ones that got away we will distpatch a team to chase them down
z03r100.wav	welcome to pearson army airfield our teams need experienced helicopter pilots you can practice on the little birds or blackhawks we have here becarefull you could be shot down on this training mission
z03r101.wav	hop in the ah6 little bird attack helicopter and follow the waypoint path to the objective destroy the cammo flaugd ground targets becarefull there firing live rounds
z03r102.wav	good shooting
z03r103.wav	this black hawk will fly you through ariel gunnery course hop on and man a mini gun
z03r104.wav	get some practice with the mini gun by destroying some of those barrels
z03r105.wav	good job we will return you to base so you can get somemore helicopter experience
z03r106.wav	fly this blackhawk to practice picking upa crew in hostal territory as you approach the landing zone you will need to avoid enemy gun fire and land quick wait for allthe men to board then head to base on the way back position the bird to prevent your men from getting shot
z03r107.wav	good flying continue practising with this bird or continue with one of the other scenarios
z03r108.wav	take this black hawk up for general flying practice you wont have any gunners so watch out for enemy fire
z03r109.wav	congratulations your ability to fly helicopters will be a value for your team
z03r110.wav	theres an enemy nv1014 recon helicopter see if you can hunt down and destroy him before he reports back to base
z03r111.wav	when approaching the aircraft use your mouse to see the attatch points and highlight one of them
z03r112.wav	to attach to the highlighted position press use normally mapped to the shift key
z03r113.wav	to switch position while attached to a vehicle hold down shift and press the corresponding number to the new position refer to the vehicle icon on the bottom of your hub if another player occupys that position you cannot switch to that position
z03r114.wav	when you attach to the pilot seat of any aircraft you automatically start the aircrafts engines the turbines will reach idle after 15 seconds if you detach from the position the rotars will begin to slow down
z03r115.wav	the aircraft is now at flight idle you may now take off using the up control mapped as the e key get in the habbit of checking your sorroundings before taking off toidentify any objects that may interfere with your flight path
z03r116.wav	the aircraft is now at flight idle you may now take off using the up control mapped as the e key get in the habbit of checking your base for any teammates wanting transport
z03r117.wav	the default aswd keys affect your helicopters flight control w forward a strafe left d strafe right s move backward when you stop pressing these keys your helicopter will hover move your mouse sideways to control your tale rotar while hovering or to bank to one side while hovering if you want to look around without turning the helicopter press and hold the right mouse button the q and e keys are the default collective controls for the helo the e is up q is down when you land you want to have as little forward speed as possible.
z03r118.wav	when using you aricrafts weapon systems use l beam crosshair you canvary the pitch slightly by moving the mouse forward and backward fire by pressing the right mouse button
z03r119.wav	if an enemy locks a heat seeking missile on to your aircraft press the space bar to drop flares these are most effective when taking abrasive action using the helicopters controls
z03r120.wav	you can control your forward speed by pressing the zx and c keys the z key sets the helicopter to the slowest speed x is medium speed and c is high speed these controls are usefull when your coming in for a landing flying low over the horizon or trying to steady the aircraft for your team mates to shoot the enemy
z03r121.wav	you can establish an orbit by holding the forward key along with the left or right strafe key press the wa keys for a left hand bank and the wd keys for a right hand bank additionally the radius of the orbit is because of your current speed the slower you go the tighter the orbit theis is usefull for creating a stable platform for your gunners
z03r122.wav	combat hlicopter pilots useually work one or nap of the earth nap of the earth involves flying low to the ground and remaining hidden enough by the terrian or the trees but fast enough to avoid small enemy arms fire becarefull not to exceed your abilitys as a pilot you have real people on board who are depending on you
z03r123.wav	when flying friendly troops on an assault mission its never sensible to fly directly over a target try to avoid detection and set down in an area that's far enough to be safe but not to far for your team mates to reach theyre objective remember your flying an expensive piece of hard ware and your troops are depending on you to get them there alive.
z03r124.wav	be sure to pay attention to your ammo counter on your hud attack helivcopters have a limited supply unlike the mini guns on a black hawk
z03r125.wav	also displayed on the hud is the vehicle damage meter if it turns red you need to return to base if it takes any more damage its likely to explode
z04r100.wav	in this mission you must defend the base from cocurure crossroads from a well armed enemy force take up a defensive position before the advancing enemy arrives you can use any emplaced weapons or choose a load out from the armory you must watch all 4 gates and do not let the enemy gain control of the base
z04r101.wav	enemy attacking the north gate we need support now
z04r102.wav	we need support at the south gate
z04r103.wav	incoming helo from the west
z04r104.wav	we got incoming vehicles at the east gate
z04r105.wav	soldier return to the base or you will be overrun you cant make it out there alone
z04r106.wav	excelent work keeping the enemy out of the base in order to stay alive you must work with your teammates
z04r107.wav	get to the roof and take down the helo
z04r108.wav	enemy armour rolling to the east gate take it down
z04r109.wav	the enemy has breached the walls
z05r100.wav	welcome topoint bishop in todays exercise you will cross the channel to a island controlled by the enemy you may choose any vehicle in the base when you land on the island you must eleminate the enemy and enter the bunkered incampment your team mates will provide additional fire power to help you proceed good luck
z05r101.wav	cangratulations on your victory remember you will need to work as a team to defeat the enemy
